

Renewable Energy & Energy Independence

Energy independence and renewable energy go hand in hand. Renewable energy provides a limitless source of free domestic fuel, and is growing and vital contribution to America's national security

Benefits to America

- Diversifying our energy mix with home-grown, clean, affordable, reliable energy employs Americans with family-supporting jobs
- Increases American independence and resiliency
- Provides economic opportunity for farmers
 - Increases certainty through increased revenue
- Offsets our country's dependence on foreign nations and fossil fuel needs

Growing renewable energy resources is a great way to build energy independence in America

Renewable Energy & Energy Independence

The compelling national security advantages of renewable energy has been recognized by national security experts, the US Congress, and many senior officials at the US Department of Defense (DOD)

DOD officials have sought to deploy renewable energy technologies at military facilities around the country, where they reduce risks

Secretary of Defense Lloyd J. Austin III said,

“We also have a once-in-a-generation opportunity to build an entire economic sector and the global infrastructure for clean energy”
